# OUR ENVIRONMENT AND SUSTAINABILITY WORK

The last years the winters have become shorter and greener. Warmer climate leads to this. We in World Cup Kvitfjell want to take part in the engagement to secure a future white winter.

We must take our responsibility, be a part of the solution, not a part of the problem.

We must take responsibility for a sustainable production.

We must be innovative, we must dare to challenge ourselves and our cooperative partners to reach the goal.

This year also we have been awarded an “Environmentally Approved Event” by the FEE Norway Foundation! This means that we are working constantly on reducing the event’s environmental and climate impact by being aware of reduction in consumption, reusing what we have as long as we are able, and recycling.

## **From word to action and innovative solutions**

Hafjell Kvitfjell Alpin organizes the World Cup and Summit Kvitfjell, and we work towards the goal that these events will be an "Environmentally approved event" by FEE.
